Call for experts ISO/PC 252 WG 1 'CNG stations for fuelling vehicles' & WG 2 'LNG stations for fuelling vehicles'

To all P, O and L members of ISO/TC 252 "Natural Gas fuelling stations for vehicles"

Dear P- and O-members,

At the Preliminary meeting of ISO/PC 252 (Schwerzenbach 2010) it was decided to establish two working groups.

To ensure all experts are informed and nominated by their national member bodies this call for experts is circulated.

Main task for the working groups is to develop two ISO publications based on the New Work Item Proposals done by the International Association for Natural Gas Vehicles (IANGV) on Liquefied natural gas (LNG) and Compressed natural gas (CNG) vehicle filling stations on 2009-03-18.

Enclosed are the experts who already have shown interest in their participation to the Working Groups (nominated and still to be nominated).

The First Working Group meetings are scheduled on **22 & 23 June 2010** in the Netherlands. These meetings will be held parallel. Please note that registration for these meetings has to be carried out through your National Standardization Body.

P-member countries are requested to nominate (additional) representative expert delegates to participate actively in the work of ISO/PC WG 1 and/or 2. O-members who want to nominate experts are requested to consider changing their membership into P-member.

Please inform me before 31 May 2010 of interested experts and send your nominations to the ISO/PC 252 secretary, shyreen.dahoe@nen.nl.

Yours sincerely,
Shyreen Dahoe
Secretary Project Committee ISO/TC 252
